

EVA-LAST

INSPIRED BY NATURE, DESIGNED FOR LIFE.

Infinity IS

LIGHTWEIGHT, CAPPED BAMBOO COMPOSITE DECKING

Infinity® IS combines all the benefits of durable Infinity® bamboo composite with the advantages of I-Series™ to give you durable co-extruded composite decking, offering low-maintenance, and an advanced resilient polymer cap for protection from scratches, fade, moisture issues, decay, and weather, as well as stain and slip resistance. With Infinity® IS you can enjoy the look of timber with its specialised streaked colour variation technology, and the environmental benefits of bamboo composite. The revolutionary I-beam design creates a cost-effective, lightweight board that uses less material, maintains span capabilities, strength, and stiffness for a more efficient installation. This improved environmentally friendly composite is holistically sustainable from its manufacturing to its use of raw materials.

UNIQUE BENEFITS

ULTIMATE DURABILITY

RESILIENT PROTECTIVE CAP

EXCEPTIONALLY LOW-MAINTENANCE

DECAY & WEATHER RESISTANT

STAIN RESISTANT

COST-EFFECTIVE

LIGHTWEIGHT

SPAN CAPABILITY

EFFICIENT INSTALLATION

A PRODUCT BY **EVA-LAST**

LIGHTWEIGHT, CAPPED BAMBOO COMPOSITE DECKING

Capping material:
Engineered polymer

Core material:
High density polymer composite

INFINITY I-SERIES COST BENEFITS

Infinity I-Series boards perform better while using less material (and creating less waste) than solid composite profiles and traditional timber. This revolutionary decking range has a lighter weight but maintains span capacity in line with other composite boards, making transportation, handling and installation faster and easier.

- Reduced decking material cost
- Reduced installation time (and cost)
- Reduced cost of fixtures and fittings (span of 400 mm on joist centres)
- Reduced cost of substructure

Infinity I-SERIES FAMILY OF PROFILES

 PATENTED TECHNOLOGY

GROOVED board
(135 x 25.4 mm)

STARTER board
(135 x 25.4 mm)

Infinity decking and trim boards are fastened using HULK composite screws and hidden fastener clips and screws

INSTALLATION AND USAGE BENEFITS

Improved heat dissipation
The I-Series family of profiles has a unique design that dissipates heat more efficiently and allows the board to cool at a much faster rate when compared to hollow and solid decking profiles.

Drains - cannot trap water
The I-Series family of profiles is specially designed to eliminate trapped water and its negative effects. The open space between the "feet" of the board allow water to travel.

Rips straighter
The balanced nature of I-Series profile extrusion creates a board that is less susceptible to bowing, warping, splitting, splintering or cracking - even when "ripped".

Lighter to move on site
The lower mass per board makes I-Series lighter weight than other composites or wooden boards. This, in turn, makes it easier to transport and easier to install.
